

Panasonic KX-NS5174

The Panasonic KX-NS5174 is a 16-port Single Line Telephone (SLT) card that adds up to 16 analog internal lines and devices to Panasonic KX-NS700 and KX-NS1000 series communication platforms. It supports FSK Caller ID and Message Waiting Indication on all ports and features 4 RJ45 sockets for connections. The card, also known as the MCSLC16, is used in conjunction with the KX-NS500, KX-NS700, and their associated shelf expansions to expand the system's capabilities.

Key Features:

- **16 Analog Lines:** Adds 16 ports for analog devices like standard telephones.
- **Caller ID:** Equipped with FSK (Frequency Shift Keying) for Caller ID information on all ports.
- **Message Waiting:** Supports message waiting indication on all ports.
- **Connectivity:** Uses 4 RJ45 (Ethernet) sockets for connection.
- **Compatibility:** Designed for use with Panasonic KX-NS700 and KX-NS1000 series communication platforms and their corresponding network servers and expansion units
