Reaching New Peaks of Performance

Archer AXE75

AXE5400 Tri-Band Wi-Fi 6E Router

Wi-Fi 6E

WiFi 6E: A Freer and Faster Future

WiFi 6E introduces the brand new 6 GHz band without any overlap or interference from other bands and older devices. This means a congestion-free frequency that offers more bandwidth, faster speed, and lower latency.

[Learn more about WiFi 6E >](#)

Maximize All Your Device Speeds

Archer AXE75 provides WiFi speeds up to 5400 Mbps, enabling your devices to run at full speed. Enjoy fluent 4K/8K streaming, immersive AR/VR gaming, and blazing-fast downloads.

2× Faster than WiFi 6

More RAM, Better Processing

With an advanced chipset and high memory, experience fast connections with minimal latency even under heavy loads. Every click and tap on your laptop or phone responds quicker.

1.7 GHz
64-Bit Quad-Core CPU

512 MB
High-Speed Memory

Connect More Stay Fast

The number of IoT devices today creates greater demands on home WiFi. Archer AXE75 future-proofs your home network with a higher capacity of up to 200+ devices. OFDMA and other advanced tech cut down the clutter throughout your frequency bands, eliminating latency and jitter.

WiFi Coverage Throughout Your Home

6× high-performance antennas boost WiFi signals throughout your home. Beamforming technology detects devices and concentrates signals towards them, especially to previously hard-to-reach areas.

USB 3.0

Easily share files between connected devices with an external drive. Or create your own personal cloud storage for simple, secure access from anywhere.*

Protect Your Children

Block inappropriate content for your children, and customize a time range for better online habits.

New Connection Notification

You will be notified by your phone when new devices connect. Kick off any suspicious connections and block them. It's as simple as that.

Easy Firmware Upgrade

Tired of upgrading firmware? OTA updates enable easy firmware upgrades with a click in the management panel. To keep your security and functions always up-to-date, just turn on the auto schedule.

Press Release: <https://www.tp-link.com/en/press/news/19912/>

†Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage are not guaranteed and will vary as a result of network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location. Use of Wi-Fi 6 (802.11ax), Wi-Fi 6E, and features including OFDMA, 1024-QAM, and HE160 require clients to also support the corresponding features. Seven 160MHz channels may not be all available in the 6 GHz band in some regions/countries due to regulatory restrictions.

△Saving clients' battery power requires clients to also support the 802.11ax Wi-Fi standard. Actual power reduction may vary as a result of network conditions, client limitations, and environmental factors.

*HomeShield includes the Free Basic Plan. Fees apply for the Pro Plan. Visit tp-link.com/homeshield for more information.

**Use of WPA3 requires clients to also support the corresponding feature.

*** This router may not support all the mandatory features as ratified in IEEE 802.11ax specification.

****Further software upgrades for feature availability may be required.
